

Longfin Salvage Trends

Catarina Pien, Grace Easterbrook, Lilly McCormick

2024-12-19

Notes on Processed Data

- Removed any row without a count, length, sample fraction
- Filtered to 2014-2025
- Assigned Life Stage (Adult $> 84\text{mm}$; Juvenile $\leq 84\text{ mm}$)
- Cumulative Salvage represents fish count/sample fraction

Notes

- There are very few instances of Adult Longfin Smelt Salvage
- Most salvage occurs in Drier Springs for Juvenile Longfin Smelt

Historical and Current Cumulative Salvage
